

Oklahoma Stud Ranch

MARE OWNER CHECKLIST FOR SHIPPED SEMEN

- ❑ Prior to shipping semen, the farm **must** have received the signed contract, a copy of mare's registration papers, a completed transportation form, the booking fee, balance of stud fee, and 1st shipping fee.
- ❑ Notify the breeding personnel within 24 hours prior to the anticipated shipping date.
- ❑ Call ahead to determine shipment days. We collect every other day, but the stallions are all on different schedules. Requests for shipped semen must be received at the farm by 5 pm central time the day prior to the shipment day to process all of the requests for that day.
- ❑ Oklahoma Stud office staff is available M-F 8:00 – 5:00. Please do not order semen on the answering machine, by the fax machine or via e-mail. Shipped semen is available on a first come first served basis with farm mares always the first priority. Each stallion has different limits and a cooled semen contract does not guarantee that semen will be available.
- ❑ We prefer to use Federal Express, in the event that is not possible we will ship counter to counter. (Be sure to check flight availability for your area in advance)
- ❑ In the case of counter-to-counter shipments, you will receive a call regarding arrival time, flight and air bill #'s. The mare owner will confirm that the shipment was received. Please remember that Oklahoma Stud cannot control flight delays.
- ❑ The Equitainer must be returned to farm at mare owner's expense. The Equitainer along with all of it's contents must be received within five working days from shipment or mare owner will be charged \$350.
- ❑ Fourteen (14) days after ovulation, notify the breeding personnel of mare's status.
- ❑ It is very important that you advise Oklahoma Stud if multiple embryos are implanted. A stud fee is due for each pregnancy.
